Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/580,608	Applicant(s) TANAKA ET AL.	
	Examiner Sue A. Weaver	Art Unit 3781	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3781

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 9 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Iizuka et al '604, of record, or Valliencourt et al '946.
3. Iizuka et al teach a synthetic resin container with a container body part 7 and bottom part 6 with at least one pressure reduction absorbing and grip panel in the container body part. The panel includes a border line 18, 19, 20, 21 between the boundary of the panel and body part, Note the single bulge 18 located at the boundary between the top side of the pressure reduction absorbing panel and the body part with the bulge being oriented toward the bottom part so that the width is larger at an upper side than a lower side. Note also the bulging part of Valliencourt at 43 larger at the top than the bottom. The claim for no accumulation of whitening is considered to be a claim for desired result which the references are capable of providing. The volume of the bottle is considered to be a matter of choice since such volume is known as shown by the references for record..
4. Claim 10 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. Applicant's arguments filed 11/18/08 have been fully considered but they are not persuasive. Applicant's argument on page 6 appears to be opposite of what is being claimed "a width larger at a lower side than an upper side" relates to the convex portion 6 not being claimed in claim 9. Moreover the problem is accumulation of resin is one

resulting with to the draw ratio as clearly stated over and over in the specification. This is not claimed in claim 9. The 112 rejection of the claims is withdrawn in view of applicants' amendment.

6. Claims 1-7, 17-20 and 22 are allowed while claims 8 and 11-16 have been canceled.

7. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.
